#### Minimum Guaranteed Contract Value

Minimum Guaranteed Contract Value (MGCV) is equal to 87.5% of premium, less withdrawals, accumulated at the Nonforfeiture Interest Rate.

#### Surrender Charge

Surrender charge percentages apply to the Account Value after the Market Value Adjustment (see below). Surrender charges will not be allowed to reduce the surrender value below the MGCV.

#### Surrender Charge Schedule

Contract Year	1	2	3	4	5	6	7	8	9	10	11+
Most States	10%	9%	8%	7%	6%	5%	4%	3%	2%	1%	0%
Variation	9%	9%	8%	7%	6%	5%	4%	3%	2%	1%	0%

Variation applies to AK, CA, CT, FL, MN, MO, OH, OK, OR, PA, SC, TX, UT, WA.

#### Market Value Adjustment

Any amounts payable that are assessed a surrender charge will also be subject to a Market Value Adjustment (MVA), which may increase or decrease the amount payable. The MVA generally increases the contract withdrawal value when interest rates fall, and decreases the contract withdrawal value when interest rates rise. The MVA is not applied a) at the end of the surrender charge period; b) to penalty-free withdrawals; c) to the death benefit at the death of the owner; or d) to any settlement option after the 5th contract year with the payments being made over at least 5 years. The MVA is not applicable in California or Florida.

#### Death Benefit

All surrender charges are waived upon death of the Owner (or first Joint Owner).

#### Annuitization Options

If annuitization is after the end of the fifth contract year, the full account value may be applied to an annuitization option with payments over at least 5 years.
